

Clifford Fischer

*Board Chairman, Tackle Tomorrow
Chairman & CEO, Fischer*

Cliff founded Fischer in 1985 as the first company to couple brokerage services for tenants with software development services for corporate real estate executives. Fischer's world-class transaction services in addition to its transformative, leading-edge technology and consulting services led to the company's quick on-boarding of several Fortune 500 clients who recognized Fischer's unique value propositions. AT&T, Citicorp, IBM, and FedEx were among the first major clients to tap Fischer's expertise in managing important real estate assets. Cliff's vision and understanding of real estate markets has led Fischer to become the global leader of real estate technology services, helping clients to achieve effective and innovative use of technology to drive business results.

Fischer has since grown to become one of the largest corporate real estate services firms that exclusively represent tenants and provides leading edge corporate services and technology to clients around the globe.
